PROFESSIONAL SUMMARY

Delivery and engineering leader with 18+ years driving complex, global technology programs from strategy through execution — including AI/ML and RAG-based products, cloud-native platforms, and enterprise service management. Proven record turning around distressed programs, transforming service delivery, and scaling engineering organizations across banking, aviation, e-commerce, and cloud infrastructure. Combine hands-on technical depth (databases, enterprise Java, Oracle Cloud Infrastructure, AI/LLM services) with executive stakeholder management, outcome-driven governance, and people leadership. PMP and CSM certified; fluent in English and Spanish.

CORE COMPETENCIES

Delivery Leadership: Program & Portfolio Management · Strategic Delivery · SDLC · Agile & Scrum · Hybrid Delivery · Release & Change Management · RAID / Risk & Dependency Management · Milestone Governance

Cloud & Technology: Oracle Cloud Infrastructure (OCI) · AI / ML · RAG & LLM Integration · DevOps · CI/CD · Databases (DB2, SQL, PL/SQL) · Enterprise Java (EJB, WebSphere, BPM) · Node.js

Service & Stakeholders: ITSM · SLA / OLA Governance · Incident & Escalation Management (P1) · Executive & Client Communication · Vendor & Contract Management · Budgeting & Financial Oversight

Leadership: Distributed & Cross-functional Team Leadership · Talent Development & Mentoring · Conflict Resolution · Organizational Scaling

Tools: Jira · ServiceNow · Confluence · MS Project · Datadog · New Relic · BigQuery · Google Analytics

PROFESSIONAL EXPERIENCE

Oracle Corporation · Guadalajara, Mexico

Nov 2021 – Jan 2026

Senior Software Development Manager

- Led ADEHub, a unified developer-experience platform, from concept to General Availability, consolidating multiple disconnected source-control (SCM) systems into a single hub used by 500+ engineers and growing ~35% year over year.
- Directed integration of a Retrieval-Augmented Generation (RAG) chatbot using OCI AI/LLM services, reducing user support tickets 9% in the first year and cutting reliance on manual documentation searches.
- Owned the full feature lifecycle — intake, prioritization, planning, development, testing, release, and validation — as primary U.S.-hours point of contact for Oracle's proprietary SCM platform.
- Delivered read-only access controls and a new reporting module, expanding audit and oversight use cases while reducing modification-permission risk.
- Established a continuous support-to-product feedback loop, centralizing triage and converting recurring issues into documentation and backlog items.
- Acted as neutral facilitator for a ~54-person engineering office, resolving manager-employee conflicts and giving remote managers visibility into local circumstances.

Envato (Placeit.net) · Guadalajara, Mexico

Mar 2019 – Nov 2021

Project Delivery Manager

- Led delivery of an AI-powered background-removal tool built on a trained ML image-segmentation model, replacing a manual editing step with full automation.
- Shipped a content-editing suite (background removal plus image and video croppers) that grew platform adoption ~6% (~10,000 new users) and extended editing capability from images to video.
- Built usage and adoption analytics dashboards (Datadog, New Relic, BigQuery, Google Analytics) that turned real usage into data-driven roadmap prioritization.
- Mentored two junior engineers into senior roles and coached a senior developer into a Project Manager and later Engineering Manager position.

Tiempo Development (now 3Pillar Global) · Guadalajara, Mexico

Jul 2016 – Oct 2018

Director of Software Delivery

- Led delivery across healthcare, transportation, and media accounts as program manager, Scrum Master, and client relationship manager for multiple concurrent engagements.

- Grew the Total Transit accessible-transportation platform, contributing to a 24% increase in customers and market visibility versus competitors, with "Great"/"Excellent" client NPS for two consecutive years.
- Delivered the EliteUB municipal-utilities platform to client acceptance with near-perfect NPS over a 1+ year engagement; recognized internally as an "Excellent Project."
- Secured a 5% discretionary budget increase in the TEN contract renewal against larger competitors, protecting and expanding delivery scope.

Tata Consultancy Services (TCS)

Aug 2008 – Dec 2015

Business Relationship Manager — Citibanamex Account

Aug 2014 – Dec 2015

Mexico City, Mexico

- Transformed Priority 1 incident management, reducing average resolution time ~97% (from ~12 days to 8 hours) and first-acknowledgement time >99% (from ~10 days to 1 hour) through clearer ownership, escalation matrices, and war-room coordination.
- Recognized by multiple client directors as the top-performing relationship manager on the account.
- Led a controlled operations takeover that preserved institutional knowledge — integrating specialists with 12+ years of mainframe banking experience and documenting runbooks and playbooks for critical processes.

ACMA Project Manager — Banco de Crédito del Perú Account

May 2013 – Aug 2014

Lima, Peru

- Recovered the bank's first TCS-led software-development program — inheriting an unbaselined scope, incomplete Statement of Work, and no accepted phases — rebuilding governance and closing all milestones within ~1 year.
- Delivered a Java / EJB / WebSphere / BPM / DB2 common architecture validated through load testing tied to milestone-acceptance criteria.

Project Manager & Account Manager — General Electric Account

Aug 2008 – May 2013

Guadalajara, Mexico

- Led delivery of ICAM, a Java aviation maintenance-forecasting platform that became one of the account's strongest revenue-producing projects.
- Introduced portfolio-wide governance (dashboards, RAID logs, milestone trackers) and an end-to-end escalation framework that reduced customer escalations ~15%.
- Secured customer acceptance across 52 project deliverables spanning Java, .NET, Oracle, and data-integration technologies.

IBM · Guadalajara, Mexico

Jul 2006 – Aug 2008

L2 Support / DB2 Analyst

- Diagnosed and resolved escalated production data and application issues on IBM's e-commerce platform across DB2 environments, improving resolution accuracy ~10% and reducing time-to-first-response ~50%.
- Grew into an informal team-lead role, tracking team performance metrics and coordinating workload and priorities.

EDUCATION

Bachelor of Engineering in Computer Science and Cybernetics

2001 – 2006

Universidad La Salle, Guadalajara, Mexico

CERTIFICATIONS & PROFESSIONAL DEVELOPMENT

- Project Management Professional (PMP)
- Certified ScrumMaster (CSM)
- Linux System Administration — O'Reilly (2023)
- Full-Stack JavaScript — Bedu (2020)
